## **5. What are Dr. Lokesh B L's medical qualifications?**

Dr Lokesh B L holds DNB, reflecting his comprehensive education in the field of Neurosurgery.

## **6. How many years of experience does Dr. Lokesh B L have?**

Dr. Lokesh B L has 23 years of experience as a Neurosurgeon. His extensive career encompasses a range of medical practices.

## **7. Who is a Neurosurgeon?**

A neurosurgeon is a medical doctor specializing in the diagnosis, treatment, and management of nervous system disorders. This includes surgical and non-surgical care for conditions affecting the brain, spinal cord, and peripheral nerves. Neurosurgical expertise encompasses a wide range of neurological conditions.

## **8. Can a neurosurgeon operate on a brain tumor?**

Yes, neurosurgeons are qualified to perform brain tumor surgery. The procedure may involve complete tumor removal or partial resection to avoid damaging vital brain tissue. If complete removal is impossible, a biopsy is performed to determine the tumor type, guiding subsequent treatment with chemotherapy or radiotherapy.

## **9. Does a neurosurgeon only perform surgery?**

Neurosurgeons offer comprehensive neurological care. While surgery is a key aspect of their practice, they prioritize non-surgical treatments whenever feasible. Minimally invasive techniques are preferred for surgical interventions, demonstrating a commitment to advanced neurosurgical practices.
