She provides treatments including Amenorrhoea Treatment, Reproduction Treatment, Pcod Pcos Treatment. She specializes in treating conditions like Pre Menstrual Syndrome, Polycystic Ovary Syndrome In Adolescence, pregnancy-and-heart-disease.

3. Why do patients visit Dr. Madhu Roy?

Dr. Madhu Roy is frequently consulted for Abortion/Medical Termination of Pregnancy (MTP), Laparoscopic Gynecology, and Fertility Conserving Procedures. For a comprehensive list of services, please refer to Dr. Roy's professional profile.

4. What is Dr. Madhu Roy's specialization?

Dr Madhu Roy specializes in Obstetrics & Gynecology. She has expertise in treating conditions such as Pre Menstrual Syndrome, Polycystic Ovary Syndrome In Adolescence, pregnancy-and-heart-disease. Her key treatments include Amenorrhoea Treatment, Reproduction Treatment, Pcod Pcos Treatment.

5. What are Dr. Madhu Roy's medical qualifications?

Dr Madhu Roy holds MBBS, MD, reflecting her comprehensive education in the field of Obstetrics & Gynecology.

6. How many years of experience does Dr. Madhu Roy have?

Dr. Madhu Roy possesses 42 years of experience in healthcare. Further details on her professional history are available upon request.

7. Who is a Gynaecologist?

A gynecologist is a medical doctor specializing in women's reproductive health. This includes the vagina, ovaries, uterus, and breasts. Gynecologists also typically have obstetrics training, managing pregnancy and childbirth.

8. What is the difference between a Gynaecologist and an Obstetrician?

A Gynaecologist specializes in women's reproductive health, while an Obstetrician focuses on pregnancy, childbirth, and postpartum care. Many Gynaecologists are also trained in Obstetrics. Pregnant women can consult either specialist; however, for general reproductive health concerns, a Gynaecologist is the appropriate healthcare provider.

9. What procedures do Gynaecologists/Obstetricians commonly perform?

****Gynaecologists**** commonly perform procedures such as Dilation and Curettage (D&C), removing the uterine lining via suction or curette, and Hysteroscopy, a minimally invasive treatment for uterine conditions. ****Obstetricians**** manage childbirth, including normal deliveries and Cesarean sections (C-sections) when necessary to ensure a safe delivery for mother and child. These procedures represent a range of services in women's health and obstetrics.

10. Does a Gynaecologist/Obstetrician treat female infertility?

Yes, Gynaecologists/Obstetricians are qualified to manage women's infertility and associated health concerns. A consultation provides infertility evaluation, diagnosis, and treatment options. If needed, your Gynaecologist/Obstetrician will refer you to a specialist for advanced care.
