6. How many years of experience does Dr. Mohan Chand Seal have?

Dr. Mohan Chand Seal has 55 years of experience in urology. His extensive career spans several locations.

7. Who is a urologist?

A urologist is a board-certified physician specializing in the diagnosis and treatment of urinary tract diseases in both men and women. Their expertise also extends to prostate conditions in men. This includes medical and surgical care for the urinary system and male reproductive organs.

8. What diseases can urologists treat?

Urologists specialize in the diagnosis and treatment of various urinary and male reproductive system disorders. These include urinary tract infections (UTIs), kidney stones, kidney cysts, interstitial cystitis (painful bladder syndrome), cancers (bladder, kidney, prostate, penile, testicular, adrenal), erectile dysfunction, male infertility, varicocele (enlarged veins in the scrotum), and childhood enuresis (bedwetting). They also manage urinary tract obstructions.

9. What is the difference between a urologist and a nephrologist?

Urologists diagnose and treat diseases of the urinary tract, including the kidneys, bladder, urethra, adrenal glands, penis, prostate, and testicles. Nephrologists specialize exclusively in kidney health and kidney diseases.

10. When should I consult a urologist?

Consult a urologist if your primary care physician refers you for persistent urinary tract infections unresponsive to treatment or other urinary tract conditions requiring specialized care. Direct consultation is recommended if you experience hematuria (blood in urine), urinary incontinence, pelvic pain, or painful/burning urination. These symptoms warrant a urology specialist's expertise for proper diagnosis and management.
