What does a Heart Specialist do?

Cardiologists diagnose and treat cardiovascular diseases. Their expertise includes assessing heart health and interpreting diagnostic tools such as electrocardiograms.

When should I consult a cardiologist?

Consult a cardiologist if your primary care physician recommends it due to symptoms such as shortness of breath, dizziness, chest pain, irregular heartbeat, or hypertension. These could indicate heart-related issues requiring specialist attention. Cardiovascular health is vital.

What to expect during my first appointment with a cardiologist?

Your initial consultation with a cardiologist will involve a comprehensive review of your medical history and risk factors for cardiovascular disease. Expect a thorough cardiovascular examination including assessment of your heart rate, blood pressure, and an electrocardiogram (ECG).
