Dr Prasant Kumar Sahoo holds MBBS; MD(Medicine); DM (Cardiology);, reflecting his comprehensive education in the field of Cardiology.

How many years of experience does Dr. Prasant Kumar Sahoo have?

Dr. Prasant Kumar Sahoo has 37 years of experience in cardiology.

What does a Cardiologist do?

Cardiologists diagnose and treat heart conditions. Their work involves identifying irregularities such as abnormal heart rhythms, blocked blood vessels, and heart murmurs. Treatment may include managing heart failure, post-heart attack care, and recommending procedures like stents, heart surgery, cardiac catheterization, and angioplasty.

When should I consult a cardiologist?

Consult a cardiologist if you experience chest pain, dizziness, palpitations, or shortness of breath; have high blood pressure, chronic kidney disease, peripheral artery disease, or diabetes; have a history of smoking; have a family history of high cholesterol or heart disease; or maintain a sedentary lifestyle. These are all potential indicators of cardiovascular issues requiring specialist attention.

What to expect at my first visit to a heart specialist?

Your initial consultation with a cardiologist will involve a comprehensive review of your medical history and risk factors for coronary artery disease. This will include a

physical examination focusing on the cardiovascular system, along with vital sign measurements (heart rate and blood pressure) and potentially an electrocardiogram (ECG).
