6. How many years of experience does Dr. Radha Rajagopalan have?

Dr. Radha Rajagopalan possesses 58 years of experience in the medical field. Her extensive career showcases her expertise and commitment to patient care.

7. Who is a General Physician?

A general physician (GP) is a medical doctor specializing in non-surgical adult healthcare. They treat various diseases not requiring surgery, encompassing cardiovascular, respiratory, neurological, hematological, endocrine, and gastrointestinal systems. Some GPs may further specialize within these areas.

8. What are the education qualifications required to become a General Physician?

General physicians, also known as primary care physicians, must complete a medical residency specializing in primary care following graduation from medical school. Prerequisites include a science-based bachelor's degree, a minimum GPA, successful completion of medical school, and fundamental medical training. A three-year residency commitment is required.

9. When should I consult a General Physician?

Consult a general physician for a wide range of non-surgical health concerns. These include cardiovascular, respiratory, musculoskeletal, neurological, gastrointestinal, and endocrine system issues. A GP is typically the first point of contact for most health problems.

10. Do General Physicians Offer Home Consultations?

General physicians provide comprehensive healthcare services, including physical examinations, immunizations, and treatment for various medical conditions. They often manage long-term patient care across different age groups. However, offering home consultations is at the physician's discretion; some may provide home visits for routine check-ups or general examinations.
