5. What are Dr. Rajaram Thangasamy's medical qualifications?

Dr Rajaram Thangasamy holds MBBS, DO, DNB (Ophthal), reflecting his comprehensive education in the field of Ophthalmology.

6. How many years of experience does Dr. Rajaram Thangasamy have?

Dr. Rajaram Thangasamy has 27 years of experience in ophthalmology.

7. Who is an Ophthalmologist?

An ophthalmologist is a medical doctor specializing in comprehensive eye care and vision. They manage a wide range of eye disorders and related conditions. Their medical training enables them to provide referrals to other specialists as needed.

8. Is an Ophthalmologist different from an Optometrist?

Yes, ophthalmologists and optometrists offer distinct eye care services. Optometrists manage common eye conditions and some chronic diseases such as glaucoma. Ophthalmologists address a broader range of eye disorders, including complex conditions requiring surgical intervention.

9. Can an Ophthalmologist perform eye surgery?

Yes, ophthalmologists are trained surgeons. Years of medical training and experience are required. Subspecialties include eyelid, retinal, and pediatric ophthalmic surgery. Surgical practice may also depend on hospital or surgical center requirements.

10. How does an ophthalmologist treat cataracts?

Ophthalmologists diagnose cataracts through eye exams including slit-lamp examination, retinal examination, and visual acuity testing. Cataract treatment involves surgical removal of the clouded lens and its replacement with an artificial intraocular lens (IOL), restoring clear vision.
