## Frequently Asked Questions

### 1. Where does Dr. S N Mehta practice?

Dr. S N Mehta's practice is located at Apollo Hospitals, Delhi. This hospital offers comprehensive healthcare services.

### 2. Who is Dr. S N Mehta?

Dr S N Mehta is a renowned Renal Transplant Surgeon with over 27 years of experience. He practices in Delhi at Apollo Hospitals Delhi. Dr S N Mehta holds a degree in MBBS, MS, FRCS. He specializes in treating conditions like Liver disease, Cirrhosis, Hemochromatosis.

### 3. Why do patients visit Dr. S N Mehta?

Patients seek Dr. S N Mehta's expertise for various treatments, including corn removal, piles treatment, and chronic kidney disease (CKD) management.

### 4. What is Dr. S N Mehta's specialization?

Dr S N Mehta specializes in Renal Transplant Surgeon. He has expertise in treating conditions such as Liver disease, Cirrhosis, Hemochromatosis.

### 5. What are Dr. S N Mehta's medical qualifications?

Dr S N Mehta holds MBBS, MS, FRCS, reflecting his comprehensive education in the field of Renal Transplant Surgeon.

### 6. How many years of experience does Dr. S N Mehta have?

Dr. S N Mehta has 47 years of experience in nephrology. His extensive career demonstrates significant expertise in kidney care.

### 7. Who is a nephrologist?

A nephrologist is a kidney specialist physician providing diagnosis, treatment, and ongoing care for kidney diseases.

## **8. Can a nephrologist treat a urinary tract infection?**

Nephrologists specialize in kidney diseases. While they can manage a urinary tract infection (UTI) that has affected the kidneys, a general practitioner or urologist is typically the first point of contact for treating UTIs. A physician will determine the appropriate treatment based on the severity and location of the infection.

## **9. Does a nephrologist perform kidney transplants?**

Kidney transplant surgery is performed by a nephrologist specializing in transplant procedures or by a nephrosurgeon. A nephrologist without surgical training cannot perform this procedure.

## **10. When should I consult a nephrologist?**

Consult a nephrologist if you experience symptoms such as urinary burning, hematuria (blood in urine), urinary dribbling, or have risk factors including hypertension, diabetes, heart disease, or a family history of kidney disease. These symptoms may indicate kidney problems requiring specialist evaluation.
