8. Who is an Orthopedist?

An orthopedist is a physician specializing in the diagnosis and treatment of musculoskeletal conditions. They manage disorders and injuries affecting bones, muscles, joints, and ligaments. Treatment areas include arthritis, back pain, sports injuries, and leg/foot pain. Orthopedic care encompasses the entire skeletal system.

9. What is the difference between an Orthopaedist and an Orthopaedic Surgeon?

While often used interchangeably, there's a key distinction. An orthopaedist manages musculoskeletal conditions, offering pre- and post-surgical care. An orthopaedic surgeon provides the same comprehensive care but also performs surgeries for conditions such as back pain, disc herniation, bone tumors, carpal tunnel syndrome, and arthritis.

10. Does an Orthopedic Specialist Treat Foot and Ankle Issues?

Yes, orthopedic specialists treat musculoskeletal conditions, including foot and ankle problems. They manage common conditions such as bunions, ankle sprains, arthritis, and sports injuries. Diagnosis utilizes imaging, and treatment methods vary based on the condition's severity. Orthopedic care encompasses a wide range of foot and ankle treatments.
