6. How many years of experience does Dr. Sirish Kumar have?

Dr. Sirish Kumar possesses 22 years of experience in ophthalmology. His extensive career includes various medical centers.

7. Who is an Ophthalmologist?

An ophthalmologist is a medical doctor specializing in eye care and vision. Unlike other eye care professionals, ophthalmologists treat a wide range of eye disorders. As medical doctors, they can provide referrals to other specialists when necessary.

8. What is the difference between an Ophthalmologist and an Optometrist?

Yes, ophthalmologists and optometrists offer distinct eye care services. Optometrists manage common eye conditions and some chronic diseases such as glaucoma. Ophthalmologists address a broader range of eye disorders, including complex issues requiring surgical intervention.

9. Can an Ophthalmologist Perform Surgery?

Yes, ophthalmologists are surgical specialists with extensive training and experience. Subspecialty training often focuses on areas such as eyelid, retinal, or pediatric ophthalmic surgery. Surgical practice may also be determined by hospital or surgical center requirements.

10. How can an ophthalmologist help with cataracts?

Ophthalmologists diagnose cataracts through eye exams, including slit-lamp examination, retinal examination, and visual acuity testing. Treatment involves cataract surgery, where the clouded lens is surgically removed and replaced with an artificial intraocular lens (IOL), restoring clear vision.
