His professional demeanor and empathetic approach contribute to a reassuring environment for his patients, facilitating healing and recovery. Whether it's performing delicate surgeries or guiding patients through challenging decisions, Dr. Das is dedicated to providing the highest level of care in the field of neurosurgery.

Frequently Asked Questions

1. Who is Dr. Sisir Das?

Dr Sisir Das is a renowned Neurosurgeon with over 25 years of experience. He practices in Kolkata at Apollo Multispecialty Hospitals. Dr Sisir Das holds a degree in MBBS, MS & Mch (Neuro Surgeon), MS (PGI, Chandigarh). He provides treatments including Craniotomy, Spinal Decompression Surgery, Ventriculoperitoneal (VP) Shunt. He specializes in treating conditions like Moyamoya Disease, Seizures, Multiple Sclerosis, Peripheral Neuropathy, Metachromatic Leukodystrophy etc.

2. What is Dr. Sisir Das's specialization?

Dr Sisir Das specializes in Neurosurgery. He has expertise in treating conditions such as Moyamoya Disease, Craniosynostosis, Epilepsy. His key treatments include Adopted Child Syndrome Treatment, Skull Treatment, Trigeminal Neuralgia Treatment.

3. What are Dr. Sisir Das's medical qualifications?

Dr Sisir Das holds MBBS, MS & Mch (Neuro Surgeon), MS (PGI, Chandigarh), reflecting his comprehensive education in the field of Neurosurgery.

4. How many years of experience does Dr. Sisir Das have?

Dr. Sisir Das possesses 35 years of experience in the medical field.

5. Who is a neurosurgeon?

A neurosurgeon is a specialist doctor who diagnoses, treats (both surgically and non-surgically), and manages disorders of the central (brain and spinal cord) and peripheral nervous systems. This includes a wide range of neurological conditions.

6. Can a neurosurgeon operate on a brain tumor?

Yes, neurosurgeons are qualified to perform brain tumor surgery. The procedure may involve complete tumor removal or partial resection to avoid damaging vital brain tissue. For inoperable tumors, a biopsy is performed to determine cell type, guiding subsequent treatment with chemotherapy or radiation therapy.

7. Does a neurosurgeon only perform surgery?

Neurosurgeons offer comprehensive neurological care. While surgery is a key part of their practice, they prioritize non-surgical treatments when appropriate. Minimally invasive techniques are preferred where feasible to reduce patient trauma. Our neurosurgeons utilize a holistic approach, combining surgical and non-surgical options for optimal patient outcomes.

8. What conditions are treated by neurosurgeons at Apollo Hospitals?

Apollo Hospitals neurosurgeons provide expert care for various neurological conditions, including birth defects, brain and spinal tumors, cerebral hemorrhage, peripheral nerve disorders (e.g., sciatica), head, neck, or spine injuries, spinal issues (like osteoarthritis and herniated discs), epilepsy/seizures, Parkinson's disease, chronic pain, and perform surgeries such as tumor removal and carpal tunnel release.

9. Can a neurologist treat nervous system birth defects?

Neurologists manage functional or developmental nervous system birth defects like Down syndrome. Structural defects, including spina bifida and hydrocephalus, necessitate neurosurgical intervention.
