Overview

Dr. Smita Malhotra is a highly skilled Paediatric Gastroenterologist with over 20 years of experience in her field. Based in Noida, Uttar Pradesh, she has dedicated her career to diagnosing and treating various gastrointestinal disorders in children. Her extensive qualifications include an MBBS degree, a DNB in Paediatrics, and she is a member of the Royal College of Paediatrics and Child Health (MRCPCH) in the UK, in addition to her Fellowship in Paediatric Gastroenterology (FPGH). This strong educational background equips her with a comprehensive understanding of the unique challenges faced by her young patients.

Fluent in English, Hindi, and Punjabi, Dr. Malhotra ensures effective communication with her diverse patient demographic, fostering trust and understanding with families. As a practitioner with Apollo Hospitals, she combines her clinical expertise with a compassionate approach, making her a preferred choice for parents seeking specialized care for their children's gastrointestinal health.

Dr. Malhotra's commitment to continuous learning and excellence has earned her respect among peers and patients alike. Her proficiency in handling various pediatric gastrointestinal issues, from simple disorders to complex conditions, positions her as a vital resource in the community. Parents can rest assured that they are entrusting their children's health to a dedicated professional who is not only knowledgeable but also deeply cares for the well-being of her patients.

Experience

Area of expertise is pediatric liver transplantation and has experience of over 250 pediatric liver transplants conducted under her active care and evaluation including babies weighing as small as 3-4 kgs suffering from acute or chronic liver failure and various metabolic liver disorders. She has been invited on national and international platforms to share her experience in the field and has prestigious publications to her credit. She is the guide for ISPGHAN and National Diplomate Board fellowships that train 4 pediatricians in pediatric gastroenterology, hepatology, nutrition and liver transplantation every year.

She also caters to children with various other GI disorders including celiac disease, malabsorption, acute and chronic diarrhoea, failure to thrive, inflammatory bowel disease, pancreatic disorders, vomiting, pain abdomen, constipation, functional GI disorders amongst others. Emergency endoscopic services for foreign body removal, upper and lower GI bleed and corrosive ingestion are provided promptly in addition to routine diagnostic and therapeutic endoscopic procedures and manometry services.
