7. Who is a General Physician?

A general physician (GP) is a medical doctor specializing in non-surgical adult healthcare. They treat various diseases not requiring surgery, encompassing conditions affecting the cardiovascular, respiratory, neurological, hematological, endocrine, and gastrointestinal systems. Some GPs may further specialize within these systems.

8. What are the educational requirements to become a General Physician?

General physicians, also known as primary care physicians, require a science-based bachelor's degree, a high GPA, successful completion of medical school, and foundational medical training. A 3-year residency in primary care is mandatory for practice.

9. When should I consult a General Physician?

Consult a general physician for a wide range of non-surgical health concerns. These include cardiovascular, respiratory, musculoskeletal, neurological, gastrointestinal, and endocrine system issues. A general physician is your first point of contact for most health problems.

10. Do General Physicians offer home consultations?

General practitioners (GPs) offer comprehensive healthcare services, including physical exams, immunizations, and treatment for various medical conditions. They often manage long-term patient care across diverse age groups. Home consultation availability varies depending on the individual physician's practice; however, some GPs may offer general check-ups or routine exams at home.
