5. How many years of experience does Dr. U K Misra have?

Dr. U K Misra possesses 52 years of experience in the medical field.

6. Who is a neurologist?

A neurologist is a medical specialist expert in diagnosing, treating, and managing nervous system disorders. They treat conditions affecting both the central nervous system (brain and spinal cord) and the peripheral nervous system, including illnesses and injuries.

7. What is the difference between a neurologist and a neurosurgeon?

Neurologists and neurosurgeons both treat nervous system disorders. However, neurosurgeons perform surgery, while neurologists do not. Neurological conditions requiring surgical intervention, like brain tumors or carpal tunnel syndrome, necessitate referral to a neurosurgeon by a neurologist.

8. What types of illnesses are treated by neurologists?

Neurologists treat various neurological conditions, including neurodegenerative disorders like Alzheimer's and Parkinson's diseases; epilepsy; headaches; back pain; brain tumors; multiple sclerosis; injuries or infections affecting the brain or spinal cord; peripheral neuropathy; pinched nerves; stroke; and tremors. Our neurology specialists provide comprehensive neurological care and treatment.

9. When should I consult a neurologist?

Consult a neurologist for neurological symptoms such as headaches, numbness, tingling, chronic pain, bladder or bowel dysfunction, muscle weakness, gait problems, tremors, involuntary

movements, confusion, memory issues, sleep disturbances, vision changes, or seizures.

Neurological care addresses the nervous system.

10. Who do neurologists collaborate with?

Neurologists collaborate with neurosurgeons in surgical planning to optimize patient outcomes.

They also engage in teaching and research to advance neurological science.
