#### How many years of experience does Dr. Amit Gupta have?

Dr. Amit Gupta has 47 years of experience in neurology. His extensive medical career spans several locations.

#### Who is a neurologist?

A neurologist is a medical specialist expert in diagnosing, treating, and managing nervous system disorders. This includes illnesses and injuries affecting both the central nervous system (brain and spinal cord) and the peripheral nervous system.

# What is the difference between a neurologist and a neurosurgeon?

Neurologists and neurosurgeons both treat nervous system disorders. However, neurosurgeons perform surgery, while neurologists do not. If surgery is needed for a neurological problem (e.g., brain tumor, carpal tunnel syndrome), a neurologist will refer the patient to a neurosurgeon for surgical intervention.

### What types of illnesses are treated by neurologists?

Neurologists treat various neurological conditions including neurodegenerative disorders like Alzheimer's and Parkinson's diseases; epilepsy; headaches; back pain; brain tumors; multiple sclerosis; injuries or infections affecting the brain or spinal cord; peripheral neuropathy; pinched nerves; stroke; and tremors. These specialists

provide expert care for brain and nervous system disorders.

#### When should I see a neurologist?

Consult a neurologist if experiencing: headaches, numbness, tingling, chronic pain, bladder or bowel dysfunction, excessive weakness, gait difficulty, jerky movements, tremors, confusion, memory problems, sleep disturbances, vision changes, or seizures. These symptoms may indicate neurological conditions requiring expert medical assessment and treatment.

#### Who do neurologists collaborate with?

Neurologists collaborate with neurosurgeons, particularly in surgical planning for patient care. Neurologists also engage in teaching and research to advance neurological science.
