He provides treatments including Age Related Macular Degeneration Treatment, Corneal Ulcer Treatment. He specializes in treating conditions like Graves disease, Kearns Sayre Syndrome, Retinal diseases.

3. Why do patients choose Dr. Aniel Malhotra?

Patients seek Dr. Aniel Malhotra's expertise for keratoconus treatment, optical coherence tomography (OCT) procedures, and glaucoma evaluation and treatment. For a comprehensive

view of his services, please refer to his professional profile.

4. What is Dr. Aniel Malhotra's specialization?

Dr Aniel Malhotra specializes in Ophthalmology. He has expertise in treating conditions such as Graves disease, Kearns Sayre Syndrome, Retinal diseases. His key treatments include Age Related Macular Degeneration Treatment, Corneal Ulcer Treatment.

5. What are Dr. Aniel Malhotra's medical qualifications?

Dr Aniel Malhotra holds MBBS, MS, DOMS, reflecting his comprehensive education in the field of Ophthalmology.

6. How many years of experience does Dr. Aniel Malhotra have?

Dr. Aniel Malhotra has 34 years of experience in ophthalmology. His extensive career includes various medical practices.

7. Who is an Ophthalmologist?

An ophthalmologist is a medical doctor specializing in comprehensive eye care and vision. Unlike other eye care professionals, ophthalmologists treat a wide range of eye diseases and conditions. As medical doctors, they can also refer patients to specialists for related health issues beyond ophthalmology.

8. Is an Ophthalmologist different from an Optometrist?

Yes, ophthalmologists and optometrists offer distinct eye care services. Optometrists manage common eye conditions and some chronic diseases such as glaucoma. Ophthalmologists address a broader range of eye disorders, including complex conditions requiring surgical intervention.

9. Can an Ophthalmologist perform eye surgery?

Yes, ophthalmologists are medical doctors specializing in eye surgery and diseases. Their extensive training encompasses various subspecialties like retinal, pediatric, or eyelid surgery. Surgical procedures performed may vary based on hospital or surgical center requirements and ophthalmologist expertise.

10. How can an Ophthalmologist help with Cataracts?

Ophthalmologists conduct comprehensive eye examinations, including slit-lamp examination, retinal examination, and visual acuity testing, to diagnose cataracts. Cataract removal requires

surgery where the clouded lens is replaced with an artificial intraocular lens (IOL), restoring clear vision. Post-operative care is also managed by the ophthalmologist.
