### **8. Who is a Pediatrician?**

A pediatrician, also known as a child specialist, is a medical doctor specializing in children's healthcare. Their expertise encompasses the physical, behavioral, and mental well-being of children, addressing a wide range of health concerns, from common childhood illnesses to complex medical conditions. Pediatric care begins at birth.

### **9. What age range of children do your Paediatricians treat?**

Apollo Hospitals' pediatricians provide care for children from birth through age 18. Well-child visits are typically more frequent during the first two years of life, then annually from ages 2 to 5. Annual check-ups are recommended until age 18. Pediatric care encompasses comprehensive

services for children of all ages within this range.

## **10. Can a Pediatrician Perform Surgery?**

Pediatricians focus on children's health. While some pediatricians, with specialized surgical training, may perform procedures, pediatric surgeons are specialists in surgical care for children. Pediatricians primarily use non-surgical methods for diagnosis and treatment. Pediatric surgical procedures range from minor (e.g., foreign body removal) to complex (e.g., cardiac surgery).
