## **7. Who is a General Physician?**

A general physician (GP) is a medical doctor specializing in nonsurgical adult healthcare. They treat various diseases not requiring surgery, encompassing cardiovascular, respiratory, neurological, hematological, endocrine, and gastrointestinal systems. Some GPs may further specialize within these systems.

## **8. What are the education requirements to become a General Physician?**

General physicians, also known as primary care physicians, require completion of a medical residency specializing in primary care following graduation from medical school. Prerequisites include a science-based bachelor's degree, a minimum GPA, successful medical school completion, and fundamental medical training. A three-year residency commitment is mandatory.

## **9. When should I consult a General Physician?**

Consult a general physician for a wide range of health concerns, including cardiovascular, respiratory, musculoskeletal, neurological, gastrointestinal, and endocrine issues. General physicians provide non-surgical treatment for various symptoms related to these body systems. They serve as the initial point of contact for most health problems.

## **10. Do General Physicians offer home visits?**

General practitioners (GPs) provide comprehensive healthcare services, including physical examinations, immunizations, and treatment for various medical conditions across all age groups. Home visit availability varies depending on the individual physician's practice; however, routine check-ups may be offered at a patient's home.
