7. Who is an Orthopedist?

An orthopedist is a physician specializing in the diagnosis and treatment of musculoskeletal disorders. They address bone, muscle, joint, and ligament conditions and injuries. Common conditions treated include arthritis, back pain, sports injuries, and leg and foot pain. Orthopedic care encompasses the entire skeletal system.

8. What is the difference between an Orthopaedist and an Orthopaedic Surgeon?

While often used interchangeably, an orthopaedist focuses on musculoskeletal system conditions, offering pre- and post-surgical care. An orthopaedic surgeon provides identical care but also performs surgeries for conditions like back pain, disc ruptures, bone tumors, carpal tunnel syndrome, arthritis, and other injuries.

9. Does an Orthopedic Doctor Treat Foot and Ankle Issues?

Yes, orthopedic specialists treat musculoskeletal disorders, including foot and ankle problems. They manage conditions such as bunions, ankle sprains, arthritis, and sports injuries. Diagnosis involves imaging techniques, and treatment varies based on severity.

10. Is a doctor referral required to see an Orthopedic specialist?

No referral is necessary to schedule an orthopedic appointment. Appointments are available at clinics and healthcare centers. However, a general physician may sometimes conduct preliminary investigations and refer patients to an orthopedist for specialized musculoskeletal system care.
